

(cap falls on the floor)

- Just getting home, honey?

- Yeah. I didn't leave work til 10:30.

- Did you eat?

- I had a sandwich. Kids okay?

- Fine. I took them for shoes and to the dentist.

- Oh, how'd they do?

- Well, Cathy only needed two fillings. Bill needed one.

- A lot better than the last time.

- Mm hmm.

- Could be the Crest.

Narrator: If your family uses Crest and has fewer cavities, don't be surprised. 12 years of tests prove Crest reduced cavities. In these tests, Crest reduced cavities 34%, 21%, 42% all against the same toothpaste but without fluoristat. Crest is accepted by the Council on Dental Therapeutics of the American Dental Association as signified by this statement and this seal. So watch between meal treats, brush often, have regular check-ups, and ask your dentist about Crest.
