- What, Unguentine? I thought it was just for burns.

- Oh, Unguentine's great for all kinds of everyday skin injuries.

Announcer: Everyone knows how wonderful Unguentine is for burns. Actually, it's just as effective for cuts and scrapes. Because science has discovered Unguentine boosts nature's healing power, as no plane antiseptic can. Look, to protect and heal a scrape like this, nature sends out tiny drops of healing serum. But tension often keeps these drops apart. So germs may get through, healing slows down. Now watch Unguentine boosts healing power, spreading natures golden drops over the wound like a protective blanket. Fights off germs to promote healing as no leading cream or liquid antiseptic can. So for cuts, scrapes, scratches, let Unguentine takeover. Unguentine Antiseptic Dressing.

- It stops the hurting too.

- You see, it's not just for burns.
