

Narrator: There is one bridge player who sure knows her card. But will she know what her hostess is stirring into that cup of coffee? Hmm looks good, doesn't it. Now let's see if she can tell. Is it Pream or cream? It's Pream. And once it's in the coffee most folks can tell. You see Pream is made entirely with fresh sweet cream and other milk products in convenient instant form. No need to keep it in the refrigerator, stays fresh on the table, always handy. Cost about a third.
