

- Once in a great while something unusual comes along which gets people genuinely excited. The Gillette Trac II razor is one of those things.

- Fabulous, that, I think is the word that wraps it up. And the way to find out how fabulous that razor is just shave with it one time.

- I can just use a track and go swish, swish across my face and all my hair is gone, I feel great.

- I shave in the grain, against the grain. This is what's fantastic about this Trac II.

- It has two blades. The first blade cuts the whisker off and before the beard can snap back, the second blade cuts off the remaining part of the whisker for a closer, smoother shave.

Narrator: The Gillette Trac II shaving system. It's the closest thing to a perfect shave.

- The best shave I've ever had and I get it every morning.
