- You guys, we cannot talk anymore. We have 48 hours to edit an entire video yearlook. We gotta come up with an idea.

- Look, we have to wrap up the whole year in 30 minutes, so I think we should come up with a theme.

- Theme?

- Theme?

- Theme.

- I'll give you a theme, okay?

- Okay.

- Student action, how's that? Could do a student activism week, we do (indistinct) issue, we have the whole business.

- You been talking about the same themes all week. Pick something-

- Look, I think we need to start out by figuring out what people want to see the most.

- Farts! (high pitched laughing) (drum roll) (Wipe Out) (music continues) (music continues) (upbeat trumpet music)

- You know, people don't think that it's really that strenuous, but it is, it gets you tired and big thing is, you have to look happy the whole time you're doing it sort of thing, it's part of the job. (upbeat trumpet music)
The camera crowd is so much fun to cheer for. Even this year, the football crowd has been a lot better than years past and we just get a lot of support from the students and the crowd and that helps us. (guitar music)

- Privileged to welcome you home. What a wonderful season, ACC champions, (crowd cheering) Eastern regional NCAA champions (crowd cheering) and the final four participants. It's been a fantastic year.

- And although you and I won't be here next year, we hope you will continue to support and do basketball because it's a class act and it's a class school and, as far as I'm concerned, it's the best place in the country to be. (crowd cheering) (piano music)

- I would hope that people would look at student action week and see that a small group of people can put together a fairly impressive range of speakers and events and get help from the whole university community from the union, the (indistinct), Chronicle, et cetera. (piano music)

- One of the reasons that we did the week was because people asked the question or pointed out that there wasn't anything worthwhile caring about. Nowadays, in the 1980s, all the major problems had been solved by the civil rights movement or whatever and one of the things about student action week was that we pointed out the, I think the major problem we have nowadays, in 1988 is there were too many things to worry about which makes it, I was so frightening that you won't actually be able to concentrate on anything. (piano music)

- There's a lot of folks who have this basic rap about students in college today, is that you're pretty much caught up in yourselves and your own lives and your own friends, that you don't care about what's going on beyond that. And I think that you all being here today is a statement that that's not true.

- And it's not true, it's told to us, over and over, that it doesn't matter, it doesn't make any difference. It does make a difference, everything makes a difference.

- The solutions aren't easily to come by, but they nearly always demand that each of us, in his own way according to his or her own interests, have something to say about them. If we decide that George Bush, Michael Dukakis and Jesse Jackson alone are going to solve these problems, It'd never be solved, but if we take it upon ourselves to do something about it, then the solutions become a little clearer. (piano music)

- They just act on what you think you can do because you can, it's amazing. (piano music)

- Why, in my heart, I feel this is important is because I love this university. I want to see it shine. (people cheering) (piano music)

- It's something to talk about, all the things we talked about tonight and you can tell by now, with me, it is not a very easy subject to deal with. I just wanna ask you, instead of just talking about it, let's act for change, okay? Put yourself in that other person's position before you make a judgment, before you assume anything, that's all I'm asking.

- What about integration on campus and interaction between the two groups? How do you think you can do anything about that?

- Well, I don't think things like that can be forced. I think it has, it's only going to be quality interaction. If it is, a natural thing if it just happens in a friendships form, I don't really think there's anything you can do to force stuff like that.

- I'm not so sure I believe in the concept of, oh wow, this is a campus problem, let's solve it because I feel like, as far as race relations are concerned, a lot of it does come with individual relationships. And those are a lot more difficult to foster simply because you can't force people to be open-minded. You can't force people to begin to understand people that are different than they are.

- And I think everyone wants to interrelate, but it's just some sort of barrier there. (helicopter whirling) (crowd cheering) (trumpet music playing)

- What do you think about what the president said today about drug abuse? Do you think mandatory testing is the answer?

- I don't think mandatory testing is the answer, but I think corporations do have, I mean private corporations have rights to make restrictions on their employees if they want to, I think.

- Do you think mandatory testing is a good idea?

- Yes, definitely.

- In all professions or just certain professions like military?

- I feel, especially in all professions that any kind of security is involved. Police department, nuclear power.

- They can test me whenever they want.

- It was interesting to have a president come, I guess.

- He said he wanted to come to the game yesterday, but couldn't get tickets.

- Ronald's here, Mr. Reagan, president Reagan. He's doing a good thing, trying to get American free from drugs and here these people are protesting something that has nothing to do with that whatsoever.

- The issue today was drug abuse in the workplace and that's what the president came here to speak about.
