

- There now. Isn't that great?

(kids laughing)

All Children: Sure is.

- Who's enjoying the program the most?

- I am.

- I am.

(June laughing)

- All right now. Before we go on, I have a riddle for you. Can you name one thing being worn by everybody watching this program?

- I know. A dress.

- Boys don't wear dresses.

June: No, they don't, do they? You give up?

- Yes.

June: A smile. You see? You're wearing a smile.

- My grandma says I have most prettiest smile in the whole world.

- She just said that because she's your grandma. (June laughing)

June: But you do have a pretty smile, Nikki. I can see you take good care of your teeth.

- I brush them a lot.

- Do you use toothpaste?

- What kind?

- I forget.

- I know. I use Crest.

- Is it this kind? Why do you use Crest?

- Because my mother buys it.

- I use Crest because I don't want to get a lot of cavities.

June: Very good. Well, here's another riddle. Who is the most important person for taking care of your teeth?

- The dentist.

June: Well, he's the expert, all right. And it is important for him to check our teeth at least twice a year, but there's somebody else.

- My mother?

June: Well, mothers are important too. They see that we get the right food and they show us how to brush. But there's still one person who does most of the work. That's you, yourself. You're the one who has to skip treats between meals.

- I have to brush all the time. (June laughing)

- And the toothpaste to remember is...

All Children: Crest.

June: Crest. For families who want fewer cavities. This seal and statement signify that Crest is accepted by the Council on Dental Therapeutics of the American Dental Association. Now to keep those smiles blooming, back to the program.
