

Narrator: Listen to what TRAC II users say when we make them shave with one blade razors.

- Ooh, I forgot how rough this single blade is.

- It's not smooth like TRAC II is.

- No injector shaves like TRAC II. The first blade sets up the whisker, so the second can shave it again. Closer. Ahhh, now that's a TRAC II shave.

Narrator: Once you get used to a TRAC II shave, no one blade razor comes close.
