

(upbeat music)

- Texaco's operating procedures at sea dictate that we make every effort to keep our oceans clean and oil-free. So when we order a new tanker to be built for us, we look at it from the ocean's point of view. Texaco Marine construction experts are assigned to the ship from the very first day building begins. Their job is to see that every precaution is taken to avoid the escape of oil at sea. (upbeat music continues) Day after day, they'll examine the pipes, the fittings, the wells, and the latest in electronic navigation equipment to guard against pollution. Today's oil needs demand more ships. Texaco, with its longstanding concern, demands that nothing be overlooked on its ships to prevent the escape of oil at sea, anywhere, at any time. We're working to keep your trust.
