

- It's no problem getting the redness out of my eyes. All these drops work just fine. They all soothe and clear my eyes. The problem is getting the drops in. So for me, it's Ocusol 'cause Ocusol's little nose bridge makes it easy. It helps steady my hands so, ta-da! Feels nice. The big difference in eyedrops is Ocusol's little nose bridge because you can't get the redness out till you get the drops in.
