

(water sloshing) (toy engine rumbling)

- Looked real, didn't it? It should. This toy tanker made of durable, styrene plastic is a 27-inch, authentic-scale model of a modern Texaco tanker. It's electric powered for use in the water. Batteries are included. The semi-concealed wheels make it usable on land. (toy wheels creaking) How can you get one? Easy. We'd like you to try Texaco climate control gasoline. And that's why Texaco dealers offer this tanker for only \$3.98 when you buy eight gallons of either Sky Chief Su-preme, Texaco's premium gasoline or Fire Chief, Texaco's regular gasoline. If your dealer doesn't have it in stock, he'll gladly give you a free, mail-away coupon and your tanker will be mailed to you, \$3.98 postpaid. It's a great gift now, or to put away for Christmas. See your Texaco dealer for your Texaco toy tanker.
