

- When the neighbors drop by for a slide show, it's fun for everyone, but, what's the answer, when you want to run off both regular-sized slides and oversized slides? The answer is the new Anscomatic, the A+ slide projector from Ansco. It's the world's only fully automatic projector to take all popular slides: cardboard, glass, metal, and plastic. And when it's time for those big 2 1/4 slides, no problem. Anscomatic projects them clear and sharp. And Anscomatic runs itself, or with the remote control, you can control your slides from anywhere in the room, at any speed you choose. At the end of the show, Anscomatic even turns on the lights. The new Anscomatic is available at most dealers for just \$11.95 down. Whether it's color films, black and white films, cameras, or projectors, if it's from Ansco, you know it's A+.
