

- Know who gives me the tougher laundry problem? Not my son, Bruce, my husband, Bob. His shirt looks cleaner, but it's got a deeper kind of dirt. Body dirt. You think a golf pro's got a nice clean job? Well, think again. Every time Bob swings a club, perspiration and natural body oil grind into his clothes. And there it is, body dirt. The dirt that digs inside clothes, wherever the skin touches. But I discovered a way to beat it. With Dash. Dash has an antibody dirt ingredient that breaks up those greasy ground in particles. Getting rid of Bruce's outside dirt is kid's stuff, but Dash does more. Dash works on body dirt, the tougher dirt. Look at that collar now. Incredibly clean. And also for the next tournament. You've gotta hand it to Dash. It even works on body dirt, and Dash will work for you.
