

- Hey mom, look what General Electric packed inside our new dryer.

- That's how I discovered bounce, the fabric softener that helps me appreciate my new dryer even more. They heated the dryer releases bounce's unique softeners to all our clothes.

- My jeans are soft.

- My dress is soft.

- My towel feels soft.

Narrator: Bounce control static better than any wind setted liquid because it works in the dryer where static builds up.

- My blouses don't cling.

- Our socks don't cling.

- My shirts don't cling.

Narrator: Fresh smell of bounce stays on our clothes long after they're out of the dryer.

- My jacket smells fresh.

- My blankets smell fresh.

- My robes smells fresh. General Electric dryers feature a durable porcelain enamel drum with a surface so smooth it prevents snagging of delicate fabrics.

- And it came with a box of them bounce.

- Bounce and our new dryer make it easy for me to do many nice things for my family.
