

(birds chirping) (caddy gulps)

- What are you making that noise for? I'm trying to putt.

- I'm sorry, I got a sore throat. It hurts when I swallow.

- Well, you know what you ought to do for that, don't ya?

- Yeah, yeah, yeah.

- Huh, huh, huh?

Caddy: My mother told me to take Spec-T by Squibb, helps make swallowing easier.

- Your mother, who's that?

- My mother.

- Well, my mother had a great remedy. Now, what she'd do is this. She got a lemon, and she cut it in half, then brought it and tried to get the juice out of it, and then she'd mix that juice with two tablespoons of glycerin. Your two tablespoons, that's what you call your one ounce. And you take that and you mix it with a glass of honey and drink it right down, really works.

- Well, long would that take?

- I don't know, maybe 10 or 12 minutes.

- Well, Spec-T works faster than that. I'm swallowing better already.

- And if you don't mind, with your permission, I'll go ahead and putter.

- I'm sorry (chuckles), go ahead. (birds chirping)

- That was a good swallow.

Narrator: Spec-T is an antibacterial troche from Squibb with a local anesthetic for temporary relief of minor sore throat due to colds. Spec-T makes a sore throat easy to swallow. Now there's a spec T for children.
