

- There. Everything's snug and dry.

- I wish I could say the same for Stephanie. She's soaked.

- Here.

- Pampers?

- Take it from an old salt. They'll keep her drier than cloth.

Announcer: Here's why. A wet cloth diaper can't keep wetness away from baby, but Pampers Stay-Dry lining and thick, absorbent padding work together to help keep wetness from coming back on baby's skin, so he stays drier.

- Wow! Ship-shape fit!

- And nice and dry around the keel.

Announcer: Pampers, for the drier bottom with the custom fit.
