

- What's the mother and one of television's best series, really like? She has a family of her own and makes life fun for them. As you might guess from the car, meet June Lockhart in private life, Mrs. John Lindsay.

June: Hello. We're just back from a little shopping expedition and these are my daughters. This is Juni she's seven.

Juni: Hi.

June: ...and this is Anne who's nine.

Anne: -How do you do?

June: You know, an old style car is fun and good for a lot of laughs. But when it comes to something as important as the health of my youngsters, I'm really serious. Come inside with us and I'll show you what I mean. Like any mother, I want to protect my family every way I know how, so when toothpaste is on the shopping list, you can just bet that we always get crest because crest proved it reduces cavities. You know what convinced me? It was tests described on television, where people using crest were tested against people using the same toothpaste, but without Florestan. Remember? the groups using crest, always had fewer cavities actually from 21% fewer cavities. When everybody brushed as usual to 46%, when everybody in the test brushed three times a day, well around this house, we don't want cavities. So we're pretty strict about those dental health rules. Watch between meal treats and,

Anne: Go to the dentist every six months

June: Mhmm and brush our teeth regularly with what Juni? [Laughs] That's right with Crest, because crest is the toothpaste for families who want fewer cavities.
