

Narrator: Just look at that speed and power. It's Roy Rogers' wonder dog, Bullet, hurrying for his favorite food, Gains Homogenized Meal. You see Gains is different than other meals. Most other meals are part flakes, part dusty powder. Ingredients often separate and nourishment can vary from feeding to feeding but because Gains is homogenized, it's completely uniform in texture and nourishment. Nourishment can't vary. So feed your dog Gains Homogenized Meal and you'll help him enjoy a longer prime of life.
