

- (sighs) Wasn't it great having the old gang over for dinner? (laughs) So many crazy things to remember.

- Yeah, but here's one thing we just forgot.

- Oh, our best glass bowl and just when I'm finishing this greasy pan. Okay. Let's have it.

- Well, wait a sec. Isn't the water too greasy now?

- Nope. I'm using Dawn dishwashing liquid.

- So?

- Dawn's plenty able to handle the grease in that water.

- Well everything looks good so far, dishes, pans. But I gotta see how this comes out. Bowl doesn't feel greasy. What do you know?

Announcer: Here's why. Half a cup of grease added to dishwater. Dawn breaks up grease, surrounds it, takes grease out of your way. Helps keep it from settling back on your dishes.

- My hands don't feel greasy either.

- Yeah. How about that?

Announcer: Dawn takes grease (squeak) out of your way.
